

(6) The general public, through competitive bidding, unless special circumstances warrant a negotiated sale for a specific purpose.

(e) By donation, abandonment or destruction.

§ 644.474 Determining method of disposal.

DE's are designees of the Chief of Engineers under AR 405-90 to determine the method of disposal authorized by law or regulations which is most advantageous to the Government. Where alternatives are presented, there will be an affirmative finding that the method of disposal approved is most advantageous. In the exercise of this authority, due consideration will be given to the effect of particular methods of disposal on safety and sanitation in the area, the proposed or probable future utilization of Government-owned sites by the Government, or in the case of leased lands, the restoration obligations of the Government under the lease. In order to assure consideration of these factors, disposals by transfer to other Government agencies or by sale intact will be brought to the attention of the installation commander or his representative prior to initiation of disposal action. Reasonable requirements for site clearance consistent with the foregoing criteria should be favorably considered and disposal conditioned accordingly, notwithstanding the fact that such action may result in a greater burden to transferee agencies or, in the case of disposal by sale intact, may result in a reduction in the monetary return which might be reasonably expected in a sale involving less stringent site clearance requirements. DAEN-REM will be informed of any instances of excessive or unreasonable requirements with respect to site clearance. The DE will determine by inspection and survey the method to be used in disposal of buildings and improvements.

§ 644.475 Excessing Army military and Air Force property.

The procedures for placing buildings and improvements in excess status are set forth in AR 405-90 and AFR 87-4. In instances of land acquisition where buildings and improvements were ac-

quired incident thereto, DEs are designated by the Chief of Engineers under AR 405-90 to make disposition of this property. Coordination with the installation commander concerned is required. When, under AFR 87-4, the responsible DE is called upon by the Air Force Command to furnish an estimate of the value of buildings and improvements for the purpose of determining the approval authority for excessing the property, no formal appraisal will be made. If, in his opinion, the total property exceeds a value of \$50,000, he will furnish only a rough estimate of its value in round figures. If the property is, in his opinion, of a value of \$50,000 or less, he will limit his statement to this fact and will not specify an estimated valuation.

§ 644.476 Excessing civil works property.

The DE are authorized to approve the disposal of buildings and improvements acquired incidental to the acquisition of land in reservoir areas, regardless of the original cost thereof, when they are in the way of authorized construction or when the land upon which they are located is to be permanently or frequently inundated. DEs may authorize the disposal of buildings and other improvements in any one or more of the following categories, which are located on lands which are not excess and which are not expected to become excess, and the sale is to be made after advertising:

(a) Buildings or improvements on land acquired by the Government determined to be available for disposal pursuant to ER 735-2-1 (Property Accounting Procedures-Civil).

(b) Buildings or improvements which cannot be kept in repair at a reasonable cost.

(c) Buildings or improvements which are dangerous to life or likely to damage adjoining structures or have become hazardous or nuisances.

(d) Buildings or improvements which are damaged or unsuitable for public service.

(e) Buildings or improvements constructed by the Federal Government which occupy or interfere with sites for new construction or for other civil works purposes.
